

MATT OXLEY

Senior Full-Stack Developer

Location: Barcelona, ES | **LinkedIn:** oxleymatthew | **Email:** matthewoxley001@gmail.com

SUMMARY

Full-stack engineer with 10+ years' experience building and scaling production software at early-stage and growth-phase companies. Core strengths in Go, TypeScript, and real-time systems, with a focus on testing and maintainability. Comfortable working across the full stack - from API architecture to frontend UX - and contributing to hiring, mentorship, and product direction. Background in experimental psychology.

EXPERIENCE

- | | |
|---|--------------------------------|
| MagicBell
<i>Partner, Full-Stack Engineer</i> | 2023-Present
<i>Remote</i> |
| <ul style="list-style-type: none">Building and maintaining a multi-tenant notification platform (email, in-app, push) as part of a five-person founding team, using Go, TypeScript, and React.Rewrote core API services from Ruby to Go, improving response times and producing a codebase that's significantly easier to debug and extend.Created technical demo videos and YouTube content to support developer onboarding and drive platform adoption. | |
| Flux.ai
<i>Founding Software Engineer</i> | 2020-2023
<i>Remote</i> |
| <ul style="list-style-type: none">Built core systems of a browser-based PCB editor - including the routing engine, circuit simulator, and real-time collaboration and performance test infrastructure - using TypeScript, Three.js, and WebSockets.Built a SPICE-compliant, fully programmable circuit simulator from scratch.Helped establish test foundations for the project - including mock generators, CI for performance benchmarks, and a multiplayer replay harness for catching concurrency bugs. | |
| Signal Noise
<i>Front-End Developer</i> | 2017-2020
<i>London, UK</i> |
| <ul style="list-style-type: none">Built interactive data visualisation dashboards with D3 and React for clients including McKinsey, The Telegraph, and The Economist.Led a team of five to build and launch Quo, a wealth management platform used by private banks and brokers. | |
| VisualDNA
<i>Junior Front-End Developer</i> | 2015-2017
<i>London, UK</i> |
| <ul style="list-style-type: none">Maintained a quiz platform serving 40 million users, focusing on uptime and frontend performance.Rebuilt the WHYAnalytics platform in React, improving maintainability and load times.Won two consecutive company hackathons. | |

EDUCATION

- | | |
|--|--|
| University of Sussex | Master of Science in Experimental Psychology |
| University of Western Australia | Bachelor of Science in Psychology |

SKILLS

Technologies: Go | JavaScript | TypeScript | React | Node.js | HTML5 | CSS | Redux | Express | Jest | Docker | AWS | CI/CD | Git | WASM
Expertise: Full-Stack Development | Scalable System Design | Domain Driven Design | UI/UX Implementation | Performance Optimisation | Data Visualisation | API Development
